OFFICIAL (ISC)2 CISSP REVIEW SEMINAR

This official review seminar is the most comprehensive, complete review of information systems security concepts and industry best practices, and the only review course endorsed by (ISC)2. As your exclusive way to review and refresh your knowledge of the domains and sub-domains of the CISSP CBK, the seminar will help you identify areas you need to study and includes:

- Guaranteed 100% up-to-date material;
- An overview of the information security field;
- Contributions from CISSPs, (ISC)2 Authorized Instructors and subject matter experts;
- Post-Seminar Self-Assessment.

WHAT IS CISSP CERTIFICATION

The CISSP® certification is a globally recognized standard of achievement that confirms an individual's knowledge in the field of information security. CISSPs are information assurance professionals who define the architecture, design, management and/or controls that assure the security of business environments. It was the first certification in the field of information security to meet the stringent requirements of ISO/IEC Standard 17024.

WHO SHOULD BECOME A CISSP

CISSP credential holders often hold job functions including:

- Security Consultant
- Security Analyst
- Security Manager
- Security Systems Engineer
- IT Director/Manager
- Chief Information Security Officer
- Security Auditor
- Director of Security
- Security Architect
- Network Architect

CISSP candidates must have a minimum of five years of direct full-time security professional work experience in two or more of the ten domains of the (ISC)2® CISSP CBK®, or four years of direct full-time security professional work experience in two or more of the ten domains of the CISSP CBK with a college degree. Alternatively, there is a one-year waiver of the professional experience requirement for holding an additional credential on the (ISC)2 approved list.

WHY BECOME A CISSP

Benefits of the CISSP for You

- Demonstrates a working knowledge of information security;
- Confirms commitment to profession;
- Offers a career differentiator, with enhanced credibility and marketability;
- Affords you exclusive benefits as an (ISC)2 member, including valuable resources such as peer networking and idea exchange;
- Indicates that certified information security professionals earn a worldwide average of 25% more than their, non-certified counterparts, according to the Global Information Security Workforce Study;
- Fulfills government and organization requirements for information security certification mandates.

Benefits of the CISSP for Your Employer

- Positions candidates on a level playing field as (ISC)2 certifications are recognized internationally;
- Provides increased credibility for your organization when working with vendors and contractors;
- Empowers employees with a universal language, circumventing ambiguity with industry-accepted terms and practices;
- Validates commitment and years of experience gained in the industry;
- Requires Continuing Professional Education (CPE) credits to ensure that personnel keep their skills current;
- Satisfies certification mandate requirements for service providers or subcontractors.

(ISC)2 Authorized Instructors

TRAINING DURATION

5 days / 40 hours

STRUCTURE

CISSP review seminar covers the entire Current Body of Knowledge for those preparing for certification. The CISSP CBK (Common Body of Knowledge) is the taxonomy of central Information Security topics (10 domains) that an Information Security Professional should understand. Updated annually, the domains reflect the most up-to-date best practices worldwide, while establishing a common framework of terms and principles to discuss, debate and resolve matters pertaining to the profession.

The 10 Domains:

1. Access Control
2. Telecommunications & Network Security
3. Information Security Governance and Risk Management
4. Software Development Security
5. Cryptography
6. Security Architecture & Design
7. Security Operations
8. Business Continuity & Disaster Recovery Planning
9. Legal, Regulations, Investigations & Compliance
10. Physical (Environmental) Security
